

USER MANUAL WIRELESS DIMMING SWITCH

The Eria wireless dimming switch is a battery-powered dimmer for ZigBee Light link and 3.0 certified lights it controls your preferred lighting setting.

Important note
Can be used without an Eria control station but offers more options in combination with an Eria control station.

3. Touch the lamp cover with the remote and keep pressing the ON button. The lamp will flash 3 times when it initiates the touch link, make sure you keep the ON button pressed after until a successful touch-link is confirmed as illustrated at step 4.

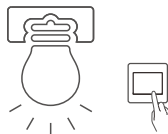

A. Troubleshoot
In case of not being able to pair the lamp successfully then follow below instructions reset the lamp.
Reset instructions:
Switch the lamp ON and OFF for 5 times until the lamp flashes 2 times.

1. Pull off the lid sticking out of the battery compartment.

For more information on installation and use please visit www.adurosmart.com/remote.

2. To use without a control station, switch on the ZigBee lamp which you want to control.

4. A successful touch link is confirmed by the lamp slowly flashing 2 times, or turning green.
